

Quartz To Suit Your Lifestyle.

The Benefits of DIFINITI Surfaces

Hassle-Free Performance

DIFINITI has low absorption eliminating the need for a sealer or topical coating. The hard, nonporous surface makes cleaning simple. In most cases, soap and water or a mild detergent are the only products required to maintain its luster.

More Than Countertops

Available in matching tile, DIFINITI Surfaces is flexible for both countertop and flooring design.

Sustainable Options

Not only is DIFINITI comprised of nature's strongest minerals, some of our colors include recycled content.

Chemical Resistant	✓	✓	Varies

* Some materials in the Enrich and Excite collections contain recycled mirror and/or glass which may be abraded with sharp or heavy objects.

Quartz To Suit Your Lifestyle.

Warranty Information

DIFINITI slabs are warranted for a period of 10 years from the date of installation to be free of manufacturing defects in residential interior applications.

While DIFINITI is heat resistant under normal cooking conditions, extreme heat may affect the beauty of any Difiniti surface. We recommend the use of trivets for roasting pans, skillets, and electronic countertop cooking devices. Damage caused by negligence, abuse or extreme heat is not covered under warranty.

Normal wear of the product based on the specific use, traffic and maintenance methods are to be expected and are not covered by this warranty. This warranty is limited solely to replacement of material only.

Easy Care & Maintenance

For daily maintenance, simply wash DIFINITI countertops and flooring with a soft cotton cloth and warm water. Mild soap may be used if desired. Please DO NOT use any form of bleach, ammonia, or Bar Keepers Friend.

If necessary, scrub area with a damp magic eraser with (light/medium) pressure. For stubborn blemishes, please use a small amount of no-bleach soft scrub, agitated with a non-scratch Scotch-Brite pad. We recommend MORE cleaning products for your quartz care needs; it's that easy to clean and maintain DIFINITI.

Things to Avoid

Several chemicals on the market are corrosive to and may attack DIFINITI surfaces. The potential damage these chemicals can cause is often irreversible. Take the precautions listed below when caring for your DIFINITI surfaces.

- Do not expose your DIFINITI surfaces to oven cleaners, abrasive cleaners, battery acid, paint removers, furniture strippers, metal cleaners or similar products.
- DIFINITI is not heatproof, chemical proof or fracture proof. By exercising common sense protections, the beauty of your DIFINITI surface will last throughout the years.
- Never use abrasive or harsh scrub pads on your DIFINITI surfaces as these can permanently scratch and dull the surface.
